

# THE SD#33 ONLINE NUMERACY SERIES PRESENTS...

## Bringing Indigenous Perspectives to Mathematics

With Christine Younghusband & Karla Gamble

©2019 MICHAEL RUSSELL

Let's start living math, instead of doing math. *Bringing Indigenous perspectives into mathematics* involves a place-consciousness approach and understanding who we are situated in the place we live in in connection to the people who live there. In this workshop, Karla and Christine will explore the role of identity, culture and local territories to understand mathematics. How can we make mathematics meaningful and purposeful for all students? As it stands, not all students are successful in mathematics. Through the lens of Indigenous worldviews and ways, we will discuss competency-rich, interdisciplinary learning experiences in math using a project or problem-based approach.

**Date:** Tuesday, May 25<sup>th</sup>, 2021

**Time:** 3:15 – 4:15

**Where:** ZOOM

*\*Zoom link will be emailed to you on May 20\**

**Target Audience:** Middle/Secondary

**Register on Perfect Mind**
